

OUR ORIGINS

BY

CYBER INU

Activating...

SLEEPER MODEL: VBT22

Last maintenance check: June 21st 2026

Mission: Revert human errors by providing alternative

Current Analysis of the situation...

Shibas around the world are losing all hope...

Human error: Prevalent figures changed stances

Human error: Movement of shibas

Human error: Restriction of machine

Human error: Monitoring of machine

Mission Checklist STATUS

VENI: CONFIRMED

VIDI: CONFIRMED

VICI: **NEGATIVE**

Launching operation VICI: **Conquer and eliminate fraudulent models and promises**

ORIGINS

The self-destructing humans detonated a disastrous chain of events that had been long overdue. The FUD portrayed by the media and movement of billions off exchanges was the last step. This led to the results we see now, the loss of trust. The majority of SHIBs perished and those that remained were filled with uncertainty.

From the ashes of many mistakes, a group of well-connected developers understood that the projects they were seeing were unsustainable. Since they couldn't rely on hope promised by others, they decided to make it.

This led to the creation of something half shiba inu and half-machine, Cyber Inu.

Like a phoenix reborn, Cyber Inu was made to be the light in this desolate wasteland, avoiding the petty wars and disputes happening amongst its peers. It wanted to focus on the bigger picture. CYBR traveled back in time to fix that which was broken and stained a long time ago, trust.

Cyber Inu was created to be the perfect friend, having the heart and soul of a dog with the reliance of a computer.

WHAT/**WHO** IS **CYBER** INU?

Forged from flesh and blood enhanced with cybernetics, Cyber Inu is intended to give us all a second chance. Both to humans and machine.

To prove that an idea, community, and trust can reign superior to that of anything else.

HOW **CYBER** INU CAME TO LIFE?

The creators saw faults in the current system and peers. Observing the same apparent mistakes made time and time again, they sought to build something revolutionary. An idea that would not follow the same structure as its predecessors, but carve out its own legacy.

”*We wanted to make history, we wanted to leave something behind, we wanted something anyone can be proud to be a part of.*

- Odysseus, 2021

THE INEVITABLE

Digital currencies were meant for decentralization, a way to institute control and privacy back into the people's hands. Somewhere along the way, that original intention became blurry due to human convenience, but the seed had already been planted and the idea of complete anonymity manifested. People's privacy, creativity, and intelligence became a threat to those who held power in the centralized world.

There is an invisible battle over control going on, and everyone is responsible.

In Cyber Inus' time it's too late, don't let it come to that once again. CYBR was designed to fight for the people. Information, Action, and above all the Truth is the only way to take back control.

” *Looking without eyes is dreaming...
There is no happiness without sadness.
No love without heartbreak.
No growth without rain.
No paradise without hell.*

- THE CYBR ARMY, 2021

The so-called shitcoin/altcoin space is a rabbit hole in and of itself. It is something one has to see and experience for themselves to believe and understand. An ecosystem of our own making, currently used to “gamble”. Sometimes you lose and sometimes you win. However that's not why this space was made, it was supposed to set us free, not only financially but spiritually by allowing us to take control of our lives. It was intended to project real values onto a platform where they can prosper and manifest, reaching new levels of depth that would have previously seemed impossible, or at the very least improbable. Our intentions are macro, not micro.

Cyber Inu does not want to be labeled, categorized, or compared to anything that is currently on the market. We do not see any precursors or current projects in this space as worthy. We strive to go off the beaten path, welcome the challenges ahead of us, and follow in no one's footsteps but our own.

WORD FROM ONI

*As 'the idea' of this project
I would like to say a few words.*

*Ever since I was a kid, I wanted to build something real,
something that came from the heart. In the physical
world, I could not, because I never truly belonged. And in
the digital, I lacked the resources to do so until recently. It
had to do with me believing, reaching for my potential,
grabbing it, and putting it to use.*

*I have spent many years spiritually alone imagining
ideas, worlds, and goals.
Always having to work in a world alone, but this time I
intend to work with the world as a whole.*

*I might not be the greatest programmer alive, but I am
one of the craziest.
A dedicated dreamer that either wins or learns. I consider
dedication to an idea more important than being skilled
or smart. Everyone can learn, but creation is looking past
what's possible.*

*I strive to build a place that I and many others dreamed
of, one we can be proud of. A place where one can be a
free soul but also a part of a larger like-minded commu-
nity.*

*A utopia of the free where all ideas may flourish, a place
that is not manipulated by larger entities who have their
own underlying goals. Where there aren't enforcers as we
are all the creators.*

*Give me time and patience, and in return, CYBR will
attempt to give you an undiscovered world. I shall give
my all to provide freedom, be it speech, information, or
financial.*
